Brand ethos

Dark-first

Shadow Heavy is the primary surface. Light mode is fully valid and audience-appropriate — it is a choice, not a fallback.

Amethyst drives the system

Amethyst is the brand personality, not merely an accent. It appears in typography, iconography, illustration and as a full background.

Accessibility is non-negotiable

Contrast rules are brand rules. Amethyst changes value on light backgrounds; text on Amethyst is always Shadow Heavy.

Inter for all generated text

Tercia is reserved for the internal design team. Never substitute a third typeface.

THE CORE RULE

Never use generic or tool-default colour schemes. Chart.js, D3 and Visualizer defaults are off-brand. When in doubt, use Amethyst **#AC75FF** on a Shadow Heavy **#1A1919** background.

APPLICATION TIERS — CHOOSE BEFORE ANYTHING ELSE

	TIER	WHEN TO USE	TREATMENT
1	Light	Ad-hoc charts, internal data, quick one-off reports	Brand colours only; transparent background matched to the host surface. No dark container, no card, no decoration.
2	Standard	Team dashboards, multi-KPI layouts, structured internal reports	Dark surfaces plus the full palette; eyebrows and cards where appropriate.
3	Full	Marketing, sales decks, customer-facing material, explicit “on-brand” requests	Tier 2 plus gradients, logo and rich layout.

When the audience is unstated, default to Tier 1 for analytical or internal work. Step up to Tier 3 only on an explicit marketing, customer-facing or “on-brand” cue.

OUTPUT FORMAT

Default to inline charts and widgets. Build a standalone file or dashboard only when asked for one, or when the layout genuinely needs multiple chart types or metric cards.

SECTION 02

Colour

The core palette, the secondary and grayscale scales, the four approved gradients, and the accessibility rules that govern every one of them.

Core palette

The foundation of all visual communication and the most frequently used colours in the system.

Avoid pure black #000000 and pure white #FFFFFF — neither is a Contentstack brand colour.

F5F5F4

Crystal Clear

#F5F5F4

Primary light background; primary text on dark

1A1919

Shadow Heavy

#1A1919

Primary dark background

AC75FF

Amethyst

#AC75FF

Brand's visual driver — typography, iconography, illustration, CTAs

AMETHYST IS NOT AN ACCENT

It drives the visual style and is one of the most important colours in the system — used for typography on dark, iconography, illustration and as a full background.

Accessible Amethyst

#8A38F5

Substitute for #AC75FF on light backgrounds — type, icons and chart fills alike. #AC75FF fails contrast on light.

Secondary and grayscale

Secondary colours add flexibility and depth without overpowering the primary palette. The grayscale utility scale carries text hierarchy, borders and neutral UI, referenced by numeric tone value.

SECONDARY COLOURS

Crystal Sheer
#EBEBEA
Subtle light backgrounds

Crystal Tint
#E1E0E0
Light backgrounds, dividers

Crystal Dim
#D4D4D3
Slightly deeper light tone

Shadow Medium
#292928
Dark card surfaces

Shadow Bold
#212121
Deeper dark surface

Shadow Ultra
#151515
Near-black surface

GRAYSCALE UTILITY SCALE

25	50	75	100	200	300	400	500	600	700	800	900	925	950	975
#F5F5F4	#EBEBEA	#E1E0E0	#D4D4D3	#C7C7C6	#B3B2B2	#9A9998	#797777	#626160	#484747	#393838	#292928	#212121	#1A1919	#151515
Crystal Clear	Crystal Sheer	Crystal Tint	Crystal Dim				Secondary text		Caption text		Shadow Medium	Shadow Bold	Shadow Heavy	Shadow Ultra

COLOUR USAGE FREQUENCY

Most often	Core palette — Crystal Clear, Shadow Heavy, Amethyst and grayscale	Everyday go-to for all applications
Occasionally	Gradients — Chroma, Prism, Aura, Tide	High-impact, expressive moments
Sparingly	Utility palette — extended families	Charts, UI states, accents, subtle pops

Gradients

A core expressive element, not a decorative add-on. Only the four gradients below are approved.

Use occasionally, not constantly. The core palette dominates; gradients appear in high-impact moments. Never apply a gradient to text, and never hand-tune the stops.

Chroma

PRIMARY / HERO

Key moments, hero sections, high-impact visuals

#B0F7BA

100% opacity · stop 0%

#899CFA

60% opacity · stop 50%

#AC75FF

30% opacity · stop 80%

#AC75FF

0% opacity · stop 100%

Prism

AMETHYST → BLUE

Use sparingly to shift tone or highlight supporting content

#AC75FF

100% opacity · stop 0%

#899CFA

65% opacity · stop 30%

#AC75FF

0% opacity · stop 100%

Aura

GREEN → BLUE

Cooler, more neutral

#B0F7BA

100% opacity · stop 0%

#899CFA

65% opacity · stop 30%

#B0F7BA

0% opacity · stop 100%

Tide

BLUE → GREEN

Subtle, cooler variant

#899CFA

100% opacity · stop 0%

#B0F7BA

65% opacity · stop 30%

#899CFA

0% opacity · stop 100%

Each gradient is a vertical, top-to-bottom linear fill. Slide-ready compositions of Chroma and Prism ship as pre-built SVG assets — cover, section, ribbon and stat-background variants — and should be used as-is rather than rebuilt.

Usage rules and accessibility

Accessibility is a core brand principle, not an afterthought. When applying colour to copy or small icons, always verify the correct Amethyst value for the background.

Dark mode

PRIMARY EXPRESSION

Aa

Background	Shadow Heavy #1A1919
Primary text	Crystal Clear #F5F5F4
Amethyst	#AC75FF for key typographic moments, icons, filled shapes

Light mode

AUDIENCE-DEPENDENT, FULLY VALID

Aa

Background	Crystal Clear #F5F5F4 or Crystal Sheer #EBEBEA
Primary text	Shadow Heavy #1A1919, or grayscale 700–950
Amethyst	#8A38F5 Accessible Amethyst — #AC75FF fails contrast

Amethyst background

CRITICAL ACCESSIBILITY RULE

Aa

All text, logos, icons	Shadow Heavy #1A1919 — required
Crystal Clear	Never — #F5F5F4 is not accessible on Amethyst

CONTRAST REFERENCE

Amethyst on dark backgrounds	✓ #AC75FF
Amethyst on light / Crystal Clear backgrounds	✓ #8A38F5
Crystal Clear on an Amethyst background	✗ Never — fails contrast
Shadow Heavy on an Amethyst background	✓ Required

ALSO AVOID

- Too many colours in a single piece
- Layering excessive gradients on coloured backgrounds
- Pure black #000000 or pure white #FFFFFF as primary brand colours
- Gradients applied to text

On dark gradients use Crystal Clear or white text; on light gradients use Accessible Amethyst #8A38F5 for any Amethyst-coloured type or icon.

Extended utility families

For charts, UI states or technical needs beyond the core palette. Use sparingly — these support the system, they do not lead it.

Amethyst family					
	Subtle #EAE3F6	Light #D2B7F9	Accent #AC75FF	Shade #654A8C	Dark #30283C
Green family					
	Subtle #EBF5EB	Light #D3F6D7	Accent #B0F7BA	Shade #65886A	Dark #313A31
Blue family					
	Subtle #E5E8F5	Light #BFC9F7	Accent #899CFA	Shade #525B89	Dark #2B2D3B
Teal family					
	Subtle #E5F3EF	Light #BFEDE4	Accent #89E6D4	Shade #528077	Dark #2B3835

HOW TO USE THEM

Reach for a utility family only when the core palette cannot carry the distinction — a fourth chart series, a UI state, a background tint. Accent matches the core chart order; Subtle and Light are for backgrounds, Shade and Dark for depth on dark surfaces.

KEEP IT RESTRAINED

Too many colours in one piece is an explicit don't. If a layout needs more than the five-step chart series, the answer is usually fewer series — not more colours.

SECTION 03

Typography

Two typefaces, one working font for everything generated,
and a fixed type scale that is never improvised per slide.

Typefaces

Contentstack uses two typefaces. **Never introduce a third.**

CRITICAL RULE

Tercia is reserved for the internal design team. In generated output — HTML, SVG, charts, documents, decks — **Inter is the working font for all text**. Do not substitute another font for Tercia.

FONT	ROLE	AVAILABILITY
Tercia	Primary / display — headlines, large headers, quotes	Internal design team only
Inter	Secondary / body — body copy, UI, captions, labels, eyebrows, chart text	Publicly available

INTER SPECIMEN — THIS DOCUMENT

Light 300

Aa Bb Cc 123

Regular 400

Aa Bb Cc 123

Medium 500

Aa Bb Cc 123

Semibold 600

Aa Bb Cc 123

Bold 700

Aa Bb Cc 123

TYPE STYLES

STYLE	FONT	WEIGHT	TRACKING	LEADING	USAGE
Eyebrow header	Inter	Medium	1%	120%	Brief uppercase label for source/design and web contexts. Never on slide content.
Headline	Tercia	Regular	0%	110%	Primary display / attention-grabbing text
Large header	Tercia	Regular	1%	110%	Section titles
Small header	Inter	Medium	0%	130%	Supporting context beneath headlines
Quotes	Tercia	Light	1%	130%	Key messages and pull quotes
Large body	Inter	Regular	0%	150%	Short-form content, intro paragraphs
Body	Inter	Regular	0%	150%	Default paragraph style
Captions	Inter	Regular	0%	130%	Image labels, notes, supplementary detail

Rows mapped to Tercia describe internal design-team source files only. They do not apply to generated output or to slide decks.

TYPOGRAPHY RULES

- Eyebrow labels are uppercase Inter Medium — web and marketing contexts only, never on slides
- Amethyst #AC75FF may emphasise type on dark; use #8A38F5 on light
- Do not track text too tightly or loosely; avoid widows
- Do not outline text; do not use unapproved fonts

Slide type scale

Slide decks use Inter exclusively — there is no Tercia in a deck. Every text element is Inter: headlines and large headers in Bold, subheads and labels in Semibold or Medium, plus quotes, body, captions and footer.

NON-NEGOTIABLE CONSTANTS

Authoring canvas is exactly **20 in × 11.25 in** (16:9) — never 13.333 × 7.5 in. Type sizes are fixed: do not improvise them per slide. Content slides carry a title and an optional subtitle — **never an eyebrow**.

ELEMENT	SIZE	NOTES
Title-slide headline	84 pt	Cover, Section and Closing hero
Content-slide title	54 pt	Always — never improvise a content title size
Subtitle	28 pt	Optional, beneath the content title
Body copy	24 pt	
Pointers (bullets)	24 pt	Rounded markers, Crystal Clear in dark mode
Page number	11 pt	Bottom right
Footer copyright	9 pt	Bottom left, after the stack icon

12

On content slides the stack icon sits bottom-left at exactly 0.41 in × 0.5 in, followed by the 9 pt copyright line, with the 11 pt page number bottom-right. Scaled proportionally here for an A4 page.

SECTION 04

Logo

The full lockup leads. Four approved colour combinations, fixed clear space, a hard minimum size, and a short list of things never to do.

Lockup and logomark

Default to the full lockup (mark plus wordmark) in all situations. The logomark alone is permitted — not promoted — in two cases only: social media avatars, using the pre-built avatar files, and space-constrained contexts where the full lockup cannot fit legibly. Do not use the logomark as a general substitute.

Full lockup

Logomark

APPROVED COLOUR COMBINATIONS — THE LOGO MUST ALWAYS APPEAR IN ONE OF THESE FOUR

**PRIMARY****Dark backgrounds**

Amethyst mark + Crystal Clear wordmark

**SECONDARY****Light backgrounds**

Amethyst mark + Shadow Heavy wordmark

**KNOCKOUT****Busy or unclear backgrounds**

Crystal Clear mark + wordmark

**REVERSAL****Busy light backgrounds**

Shadow Heavy mark + wordmark

When in doubt, use the primary Amethyst and Crystal Clear version. Never recreate the logo — always place the official file. PNG is the default for digital use; EPS is the primary print format, with CMYK the default colour mode unless a vendor requests PMS.

Clear space and sizing

Maintain minimum clear space equal to the **height of the logomark** on all four sides. Never crowd the logo with text, images or other elements, and keep it clear of edges, folds and distractions.

X = the height of the logomark. Do not crop the logomark too close to the edge in avatars, or place the lockup too close to the edge of a composition.

MINIMUM SIZE

18 px min

18 px min

Both the full lockup and the logomark have a minimum height of **18 px** for digital use. Do not scale below this — legibility and recognition break down.

CO-BRANDING

Used frequently in prospect and partner decks.

- Contentstack logo on the **left**, partner logo on the **right**
- Separate the two with a thin vertical divider in Tone 400 #9A9998
- Both logos get equal visual weight and spacing
- Dark mode preferred — Amethyst and Crystal Clear Contentstack logo, partner logo in Crystal Clear or white
- Works with the full lockup or logomark-only, depending on space

Logo don'ts

The logo is a fixed asset. Place the official file — never redraw, recolour outside the four approved combinations, or decorate it.

For any variant, colour or print format beyond the bundled source files, use the official asset library rather than modifying a logo by hand.

FILE FORMATS — DIGITAL

- **PNG** — default for all digital use: presentations, documents, web, social
- **SVG** — only if specifically requested
- **JPG** — legacy fallback only; do not recommend

FILE FORMATS — PRINT

- **EPS** — primary format for print vendors
- **PDF** — alternative if a vendor requests it
- **CMYK** default; **PMS** coated or uncoated only on vendor request

AVATARS AND FAVICON

- Square avatar — Shadow Heavy mark on an Amethyst square; crops to circle
- Circle avatar — only where a platform requires it
- Favicon — Amethyst mark on transparent, web only

SECTION 05

Applications

How the system lands in practice — iconography, charts and data visualisation, and the photography library.

Iconography

Contentstack uses two icon types with distinct purposes. Retrieve existing icon assets from the shared library rather than generating from scratch where they are available.

MARKETING ICONS

Expressive, custom illustrations used to tell the brand story — more visual and characterful than utility icons.

Content

Delivery

Personalise

Composable

Grid	Design at 48 × 48 px on a 48 px scale, using a 24 × 24 grid
Structure	Reference Google Material Symbols (Sharp) as a structural guide
Stroke weight	1.5 px
Stroke colour	Dark mode #8C8C8C · Light mode #575757
Fill	Highlight one or two shapes only with Amethyst #AC75FF — never fill every shape

UTILITY ICONS

Functional icons used across product, marketing and layout. Clarity-first, not expressive.

GOOGLE MATERIAL SYMBOLS SETTINGS

Style	Sharp
Weight	300
Grade	Normal
Fill	Off
Optical size	24 dp

PRINCIPLES

- Use icons to support clarity, not as decoration
- Place them only where visual context genuinely improves understanding
- Maintain consistent sizing and alignment
- Avoid overuse

Charts and data

Never use Chart.js, D3 or other tool defaults — they are off-brand. Match output complexity to request complexity; do not default to the richest treatment.

CONTAINER AND CANVAS

Outer background	#1A1919 Shadow Heavy
Card / surface	#292928 Shadow Medium
Border radius	12 px
Font	Inter throughout
Axis tick labels	#797777
Grid lines	rgba(255,255,255,0.06)
Tooltip bg / border	#292928 / #393838
Tooltip title / body	#9A9998 / #F5F5F4

MULTI-SERIES COLOUR ORDER

1		Amethyst	#AC75FF
2		Blue Accent	#899CFA
3		Green Accent	#B0F7BA
4		Amethyst Shade	#654A8C
5		Blue Shade	#525B89

TITLES AND LABELS

- Always include a chart title — #F5F5F4, Inter Semibold
- Eyebrow labels — #AC75FF, Inter Medium, uppercase
- Source caption where known — 11 px, #484747

QUARTERLY

Tier 2 chart — card, eyebrow, source caption

Source: illustrative sample data

COMPLEXITY LADDER

Single metric or dimension

Bare chart only — no cards, no eyebrow

Multiple KPIs or comparative context

Add metric cards for key figures only

Explicit dashboard or report request

Full treatment — eyebrow, metric cards, source caption, rich layout

Tier 1 charts carry no card or container. On a light surface use #8A38F5 fills, #888 ticks and rgba(0,0,0,0.06) grid lines; on a dark surface use #AC75FF fills, #797777 ticks and rgba(255,255,255,0.06) grid lines.

Photography

THE LOOK IN ONE LINE

Bright, candid, optimistic business lifestyle — diverse real people using technology in believable modern environments, shot with natural light, shallow focus, and room for the brand to speak.

LIBRARY STRUCTURE

01 Industries and use cases

Vertical landing pages, solution pages

Localisation, Personalisation, Portals & Knowledge Bases; CPG, Tech, Retail, E-commerce, Travel, Financial Services, Manufacturing

02 Personas

Audience-targeted pages and campaigns

Business leaders, digital leaders, developers & IT — cast to match the role

03 General

Anything without a specific vertical or persona fit

Broad business lifestyle — the safe default

04 Perspective

Hero banners, mood, editorial, storytelling

Atmospheric lifestyle — lead with feeling and environment

ART DIRECTION

SUBJECTS

People are the heart of nearly every image. Casting is deliberately diverse and inclusive across ethnicity, age and gender, with strong natural representation of women in leadership, developer and customer roles.

ENVIRONMENTS

Modern, bright and aspirational but believable — open-plan offices, glass-walled meeting rooms, home offices, cafés, retail floors, server rooms, city streets. Context is kept, never stripped to a blank studio.

TECHNOLOGY

Shown in use, never as a hero product shot. The recurring beat is people getting things done with digital tools.

MOOD

Overwhelmingly positive and energetic — confident, productive and human. Even focused shots read as purposeful rather than tense.

LIGHT AND COMPOSITION

Natural, bright, airy light with clean contemporary colour. Candid framing, shallow depth of field, dynamic angles where useful, and intentional copy space for headlines.

ALWAYS

- People first, genuine positive human moments
- Technology in authentic use
- Diversity sustained across any set used together
- Bright, natural, modern look so images sit together cohesively
- Copy space where the image carries overlaid text
- Licensed finals only

NEVER

- Stiff, posed or dated corporate-stock clichés
- Heavy, inconsistent colour treatments that clash side by side
- Product or device close-ups with no human context
- Mixing wildly different lighting or moods in one layout
- Watermarked preview comps in production

BRAND ALIGNMENT

Pair imagery with the brand palette and Inter rather than competing with it. Favour images whose negative space and tone let brand colour and copy stand out cleanly.

IN SUMMARY

Dark-first. Amethyst-driven. Accessible by default.

When in doubt

Amethyst **#AC75FF** on Shadow Heavy **#1A1919**, set in Inter. Never a tool-default palette.

On light backgrounds

Swap to Accessible Amethyst **#8A38F5** for type, icons and chart fills.

On Amethyst

All text, logos and icons are Shadow Heavy **#1A1919**. Crystal Clear is never used there.

Pick the tier first

Tier 1 for internal and analytical work. Tier 3 only on an explicit customer-facing cue.

© 2026 Contentstack. All rights reserved.

Brand Guidelines · August 2026
